12. Explanation of the Reference Numbering

1. Effective immediately every office will number letters with consecutive figures, commencing with number 1. The reference number of letters will tally with that of the originating office, immediately followed by the serial number of the letter concerned, for instance:

261/525: Machine Tools M S, Region 5, letter number 25.
262/11 Tools an Instruments Section, Region 1, letter number 1.
2631/5 Welding and Testing Equipment, letter number 5.

2. The first figure of the reference number denotes the number of the Division (2). The following digits denote internal sections and sub-sections.
3. The initials of the originator will appear in the left bottom of the letter, together with the initials of the typist, divided by an oblique stroke, e.g. Ing.M.C./i., below the distribution diagram:

c./201 c.261/3
c./250 c.262/2 etc.

4. In case the left bottom part of the letter already contains a small window (square) with the name (initials) and telephone number of the originating official, the typist will put his (her) initials below the distribution diagram.
